# *Ready For A Great Visual Transformation?*

\* \* \* \* \*

**All you need are d-c-fix® Vinyls,  
scissors or knife, a straight edge,  
a pencil and a little imagination!**

## **ABOUT THE PRODUCT:**

Repositionable adhesive even allows you to make mistakes! Carefully remove the vinyl to avoid any stretching, then reapply. Adhesive maintains a permanent bond yet is easily removed without the use of solvents.

Standard width is 17.75". Some colors and patterns are also available in 35" width. Standard length is 49.21'. Some of the thicker vinyls such as MIRROR are 32.81' long. Using the appropriate width for your application will help to avoid waste, but don't discard the remnants. You can use leftovers for any number of small projects!

## **ABOUT OUR STOCK:**

Most of the 17.75" width vinyls listed in this brochure are currently in stock and are SHIPPED THE SAME DAY — some of the 35" width also. All of the products listed, if not in stock, are normally available in 8 weeks. On occasion, we can get special order items in less time, approximately 4-5 weeks. So plan ahead when possible! We'll do our best regardless!

Call us toll-free to check stock or to confirm a price or delivery. We'll be happy to help you match or coordinate colors too!

\* Also available in 35" width - Special Order. Allow 8 weeks for delivery of 35" width. Minimum order is 3 rolls per color. Underlined items are discontinued but may still be available.

# Tips and Tricks with d-c-fix®!

1. Prepare surface by removing all grease, dust and dirt. Rough surfaces should be smoothed out with filler and fine sandpaper, then brushed or wiped clean.
2. Measure and mark backing paper. The printed grid lines on the backing paper will assist you in measuring and cutting.
3. Cut with sharp scissors or knife and straight edge. Long lengths may be anchored with a weighted object to prevent the vinyl from rolling back up.
4. Because patterns need to be matched, they should be cut with the design side up, somewhat longer than the length measured. Tile designs should be cut on the "seam".
5. To avoid stretching, remove backing paper slowly and evenly.
6. For large flat surfaces, start with a corner or edge, leaving most of the backing paper still attached. Working from the center out, use a soft cloth to press the vinyl down as you remove the backing paper.
7. Even with careful work, air bubbles may form. Simply puncture with a pin and press out the trapped air with your fingertips.
8. Edges may be creased with forefinger and thumb. For round edges, notch the overlap at one inch intervals to fasten easily over the edge.
9. *A Special Hint For Covering Arched Or Round Objects:* Although we would normally warn against heating or stretching d-c-fix Vinyls, in many cases it is appropriate to use a hair dryer. With heated vinyl, you can cover round surfaces. We suggest using a partner and practicing first on a similar object. This will help you get a feel for the amount of heating and stretching necessary for your particular job.
10. Glass, plastic or metal surfaces may be moistened with water and a few drops of liquid soap for extra maneuverability when positioning the vinyl. Once vinyl is in place, force the liquid out with a squeegee or cloth. If necessary, dust porous wood surfaces with baby powder and brush lightly to prevent adhesive from sticking too quickly. These steps will initially reduce the adhesiveness, making adjustments simpler.
11. Mild soapy water is all you'll need for cleaning. Stubborn stains respond to a little alcohol. Never use scouring agents, thinners, acetone or petroleum based cleaners.
